Subject: Ammo in guns

IMPORTANT - URGENT ATTENTION REQUIRED

We recently discovered that we shipped 3 rifles that were loaded with ammunition. We take several steps to make sure that this could not happen but our system was circumvented and subsequently failed. No one was hurt thank goodness. We have now taken several additional steps to **guarantee** that this could not happen again. In the meantime, we need each distributor to inspect each of our guns that you have in inventory to make sure that they do not contain ammunition. We will reimburse you for the labor. We regret the inconvenience and we apologize for the failure on our part. We have already mailed each dealer we have listed on our website to advise them of the circumstances and asked them to check their inventory as well as any incoming Henry inventory.
